

Tree growth by maximum depth -- LBW-only model

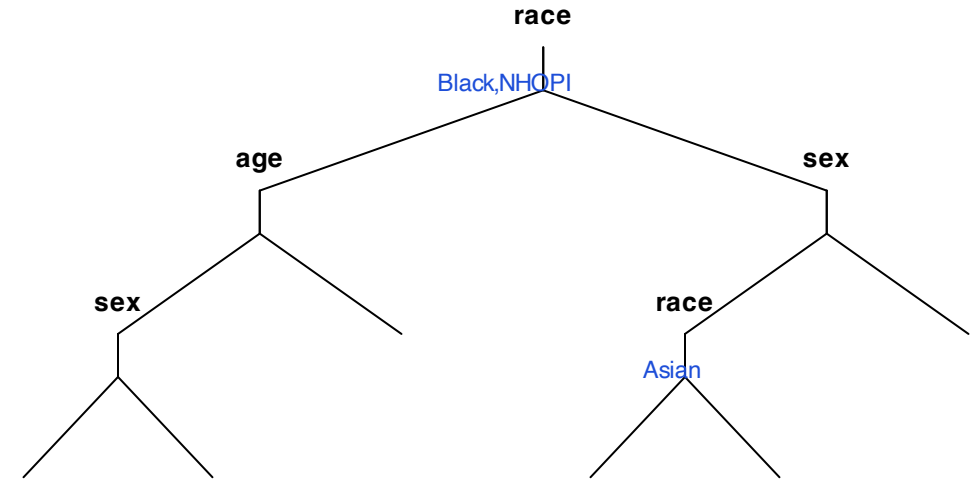

maxdepth = 2

4 terminal nodes | 3 predictors used

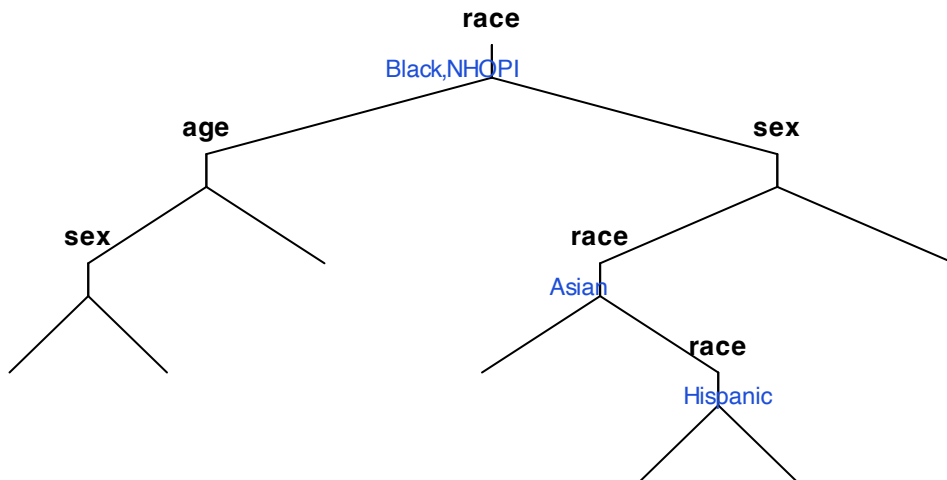

maxdepth = 3

6 terminal nodes | 3 predictors used

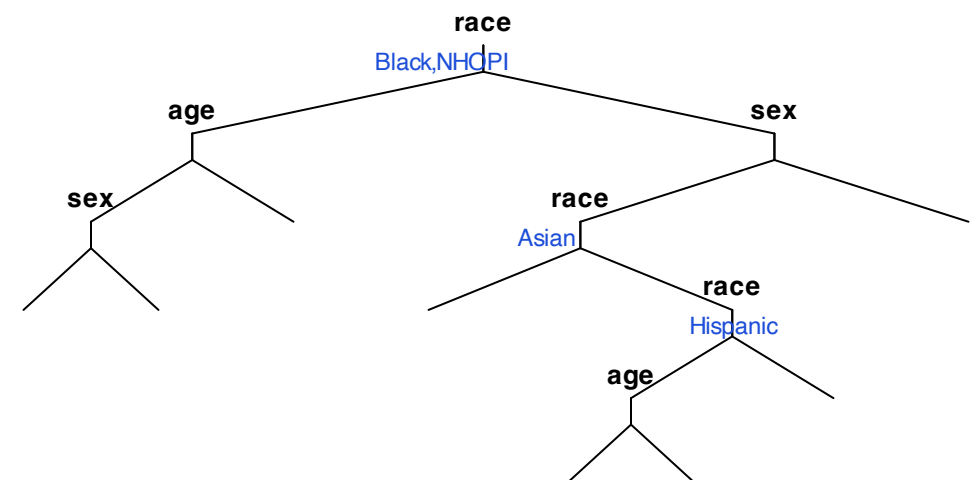

maxdepth = 4

7 terminal nodes | 3 predictors used

maxdepth = 5

8 terminal nodes | 3 predictors used

Blue labels give the levels sent LEFT; binary splits are unlabelled. Terminal-node values omitted at this scale.
